Copart, Inc. (NASDAQ: CPRT)

Company Update: FY2027E–FY2028E Revenue and EBITDA Forecast

22 October 2026. US$ millions unless stated; fiscal year ends 31 July. Forecast only: no rating, price target or valuation. Forecast file: *forecasts/CPRT/forecast.json*; tags resolve in Appendix B.

1. Summary

FORECAST UPDATE

■ **We forecast FY2027E revenue of $5.49bn (+18%) and FY2028E of $6.22bn (+13%), with almost all of the step-up from ACV Auctions [E1][S5][S6].** Copart's organic business was flat in FY2026A at $4.67bn (+0.4%) [A2]. That flat year reflects a hurricane-inflated FY2025 comparison [A5]. The ACV deal closed on 16 October 2026 [A13], and we add $718M of ACV revenue in FY2027E and $1.03bn in FY2028E [S5][S6]. Copart gives no guidance, so the totals are consensus [E1]. Our line build lands within 1% of consensus for FY2027E and 4% below for FY2028E [C5].

■ **Organic revenue grows about 2% in FY2027E to $4.77bn, with International service the fastest line [C10][S3].** U.S. service revenues are 73% of sales [A1]. They fell 1.8% in FY2026A on lower volume and the loss of hurricane revenue, partly offset by higher revenue per car [A5]. We assume +2% with no major catastrophe [S1]. International service grew 12% (about 8% ex-FX) on revenue per car, volume and a seller shift to consignment [A5][A6]. We assume +9% [S3].

■ **Adjusted EBITDA reaches $2.02bn in FY2027E (+5%) and $2.25bn in FY2028E, but the margin falls about 440bps to 36.8% on ACV mix [S7][S8][C8].** We hold Copart's organic cash gross margin at the FY2026A level of 49.2% [C3]. We hold G&A at the Q4 run rate [C4]. Organic margin stays near 41% [S7]. ACV runs at a high-single to low-double-digit adjusted EBITDA margin [G1][S8]. Copart does not report adjusted EBITDA; we define it as operating income plus D&A plus stock compensation [C2].

■ **The key risk is the Q4 FY2026A margin slip: cash gross margin was 46.6% vs. 49.2% for the year [C3].** If that persists, our bear case gives FY2027E EBITDA of $1.84bn (34.1% margin) on consensus-low revenue of $5.40bn [E1][S7]. Upside comes from catastrophe volumes, which we do not model, and from ACV synergies, which Copart has not quantified [G3].

Figure 1 shows the top-line step-up from ACV and the dilution to the group margin.

Figure 1 – Financial summary

US$M	FY2025A	FY2026A	FY2027E	FY2028E
Revenue	4,647	4,666	5,488	6,217
Growth	9.7%	0.4%	17.6%	13.3%
Gross margin	45.2%	44.7%	45.5%	45.7%
Adj. EBITDA	1,951	1,921	2,020	2,247
EBITDA growth	–	−1.5%	5.2%	11.2%
EBITDA margin	42.0%	41.2%	36.8%	36.1%

Source: Copart 10-K and Q4 release [A2][A3]; consensus [E1]; our estimates [S7][S8][C2][C7][C8].

2. Business Description and Reporting Lines

Copart runs online vehicle auctions, mainly for insurers disposing of total-loss vehicles. It sold more than 4 million units in the last year across 11 countries [A16]. Insurance sellers supplied 79% of vehicles processed in FY2026A [A9]. Copart reports two segments, U.S. and International, each split into service revenues and vehicle sales [A1].

- **Service revenues** are fees on consigned vehicles: listing, selling (fixed, tiered or a percentage of the sale price), transport, title and storage fees.
- **Vehicle sales** are the gross proceeds of cars Copart buys for its own account and resells. Margins on these are thin.

ACV Auctions is a U.S. digital dealer-to-dealer wholesale marketplace. It earns marketplace fees, service fees and customer assurance revenue [A11]. Since 16 October 2026 it has operated as an independent subsidiary [A13].

Figure 2 shows that U.S. service fees dominate the FY2026A mix.

Figure 2 – Revenue by line, FY2026A

Line	US$M	Share
U.S. service revenues	3,388	72.6%
U.S. vehicle sales	419.1	9.0%
International service revenues	581.2	12.5%
International vehicle sales	277.5	5.9%
Total	**4,666**	**100%**

Source: Copart FY2026 10-K segment note [A1][A2].

3. Management

A. Jayson Adair is CEO and signed the FY2026 10-K. Leah Stearns is CFO [A14]. Former CEO Jeffrey Liaw left under a transition and separation agreement dated 25 June 2026, per the 10-K exhibit list [A19]. On 14 October 2026 the board granted Adair an option on 20 million shares, in four tranches priced at $26.27 to $52.54 and vesting after five years [A14]. The grant is subject to stockholder approval.

We have not verified Adair's earlier tenure, prior roles or ownership in a filing for this report (Not verified). The capital-allocation record we can see is mixed: - Copart repurchased $1.63bn of stock in FY2026A after none in FY2025A [A3]. - It is funding the $1.9bn ACV purchase from cash [A17][G3]. - The record on large deals is thin. ACV is far larger than Purple Wave (2023, $108M) [A18].

4. Key Developments

The ACV deal and the leadership change dominate the past four months, as Figure 3 shows.

Figure 3 – Key developments

Date	Event
25 Jun 2026	Transition agreement with former CEO Jeffrey Liaw (10-K exhibit) [A19]
10 Sep 2026	Q4 FY2026A: revenue +2.4%, gross profit −5.5% [A4][A3]
10 Sep 2026	Agreement to buy ACV Auctions at $10.50/share, ~$1.9bn, all cash [A17]
14 Oct 2026	CEO granted 20M-share option, five-year cliff [A14]
15–16 Oct 2026	ACV tender completed (116.8M shares); deal closed [A13]
FY2026A	$1.63bn of buybacks [A3]

Source: Copart SEC filings [A3][A4][A13][A14][A17].

What matters most is that ACV adds a growing, lower-margin dealer business to a flat, very high-margin salvage franchise. Management expects the deal to be neutral to EPS in the first full year and accretive from fiscal 2028, but gives no synergy figure [G3].

5. Business Drivers by Line

U.S. service revenues (73%). This line is units × fee per car. - Volume: total-loss frequency, accident frequency and catastrophes drive units. Winter adds 5–20% to facility volumes [A8][A10]. U.S. volume fell in FY2026A, and the insurance share of units slipped from 81% to 79% [A5][A9]. - Price: many fees are linked to the auction price, so used-car values, scrap prices and FX for overseas buyers feed through [A8]. Revenue per car rose in FY2026A [A5]. - FY2025A included one-time revenue from hurricanes Helene and Milton [A5]. FY2026A is therefore a clean base. - We assume +2% in FY2027E and +3% in FY2028E, with no major storm [S1].

U.S. vehicle sales (9%). This line is mix-driven: revenue per car rose on mix while volume fell [A6]. Cost of vehicle sales moves with it, so the EBITDA impact is small [A12]. We assume +3% a year [S2].

International service revenues (12%). Revenue per car, volume and sellers moving from purchase to consignment all helped [A5][A6]. FX added $21.9M in FY2026A [A5]. We assume +9% a year, with no further FX help [S3].

International vehicle sales (6%). The consignment shift removes volume from this line and adds fees to service revenue [A6]. We assume +1% a year [S4].

ACV Auctions. - Track record: revenue rose from $358M to $760M over 2021–2025 [A15]. Q2 2026 revenue grew 10% on flat units, so growth is coming from fee per unit and services rather than volume [A11]. - Guidance: pre-close, ACV guided 2026 revenue of $845–855M and adjusted EBITDA of $73–77M [G1]. - Our build: we include 77 days of Q4 2026 plus seven months of 2027 consensus in FY2027E [S5][E2]. FY2028E assumes 10% growth in 2028 [S6].

6. Risks

Margin erosion. Q4 FY2026A cash gross margin fell to 46.6% and adjusted EBITDA margin to 38.2%, from 42.2% a year earlier [C3][C2]. Each 100bps of organic cash gross margin is worth about $48M of FY2027E EBITDA [C10][C3].

Volume. Lower total-loss frequency, falling insurer share or lower claims frequency would hit the largest line [A8][A9].

Used-car and scrap prices. These drive fee per car on percentage-based fees [A8].

Integration. ACV is Copart's largest deal. Synergies are unquantified, and integration costs and purchase accounting could change the reported ACV contribution [G3][A13].

Dealer wholesale cycle. ACV cited "ongoing headwinds in the dealer wholesale market" [A11].

Catastrophes. Storms cut both ways: they lift revenue, as in FY2025A, but they also bring one-time costs [A5][A7].

FX. A stronger dollar reduces both International revenue and overseas buyer demand [A5][A8].

Dilution. The 20M-share CEO option adds stock compensation; it is excluded from our EBITDA [A14][C2].

7. Forecast

How the evidence becomes the numbers

Copart gives no revenue or EBITDA guidance. We therefore anchor the totals to consensus, which clearly includes ACV: FY2027E growth of 18% vs. 0.4% in FY2026A [E1][A2]. We build each line from its volume and price drivers, add ACV from its own guidance and consensus, and scale the lines in proportion to the consensus total. That adjustment is under 1% for FY2027E. For FY2028E our build is about 4% below consensus, so the lines are scaled up by that much [C5]. For EBITDA, we hold the FY2026A organic cash gross margin and the Q4 G&A run rate, then add ACV at its guided-to-improving margin [C3][C4][S7][S8]. Figure 4 maps each piece of evidence to its assumption.

Figure 4 – Evidence → assumption → forecast impact

Evidence	Assumption	Impact
No Copart guidance; consensus $5,488M / $6,217M [E1]	Totals = consensus mean; lines scaled	FY2027E build within 1%; FY2028E lifted ~4% [C5]
FY2025A hurricane revenue was one-time [A5]	No catastrophe in FY2027E–28E	U.S. service +2% / +3% [S1]
Revenue per car up, U.S. volume down [A5][A6]	Price offsets volume	U.S. vehicle sales +3% [S2]
Intl ~8% ex-FX growth, consignment shift [A5] [A6]	Intl service +9%, Intl vehicle +1%	+$48M / +$90M Intl service [S3][S4]
ACV closed 16 Oct 2026; 2026 guide $845–855M [A13][G1]	77-day stub + 7/12 of 2027 consensus	ACV $718M FY2027E, $1,033M FY2028E [S5][S6]
FY2026A cash GM 49.2%; Q4 46.6% [C3]	Base holds 49.2%; bear uses 46.6%	Organic EBITDA $1,954M base vs. $1,788M bear [S7]
Q4 G&A $97.8M [A3]	Flat run rate FY2027E, +5% FY2028E	G&A $391M / $411M [C4][S7]
ACV 2026 margin ~8.8%; synergies unquantified [G1][G3]	10% / 11% margin; no synergies	ACV EBITDA $67M / $110M [S8]

Source: [A3][A5][A6][A13][E1][G1][G3]; our assumptions [S1]–[S8]; calculations [C3]–[C5].

Base case

Figure 5 shows that the four Copart lines grow modestly and ACV supplies most of the growth.

Figure 5 – Base case by line

US$M	FY2025A	FY2026A	FY2027E	FY2028E
U.S. service revenues	3,452	3,388	3,433	3,707
U.S. vehicle sales	403.5	419.1	428.9	463.0
International service revenues	517.1	581.2	629.4	719.0
International vehicle sales	274.8	277.5	278.5	294.8
ACV Auctions	–	–	717.8	1,033
Total revenue	**4,647**	**4,666**	**5,488**	**6,217**
Growth	9.7%	0.4%	17.6%	13.3%
Organic revenue	4,647	4,666	4,770	5,183
Adj. EBITDA	1,951	1,921	2,020	2,247
of which ACV	–	–	66.5	109.6
EBITDA margin	42.0%	41.2%	36.8%	36.1%

Source: [A1][A2][C2] actuals; [E1] totals; [S1]–[S8][C5] lines and EBITDA. May not sum due to rounding.

Appendix A – Bull and Bear Cases

Figure 6 shows that the spread comes mainly from margin, not revenue: consensus high and low are only ±2% around the mean [E1].

Figure 6 – Scenarios

US$M	Bear FY27E	Base FY27E	Bull FY27E	Bear FY28E	Base FY28E	Bull FY28E
Revenue	5,404	5,488	5,571	6,057	6,217	6,320
of which ACV	706.8	717.8	728.7	1,007	1,033	1,050
Gross margin	43.0%	45.5%	45.9%	43.3%	45.7%	46.1%
Adj. EBITDA	1,842	2,020	2,078	2,011	2,247	2,333
EBITDA margin	34.1%	36.8%	37.3%	33.2%	36.1%	36.9%

Source: forecast file scenarios; [E1][C3][S7][S8].

Bear. Revenue is at the consensus low [E1]. The Q4 FY2026A cash gross margin of 46.6% persists [C3]. G&A runs 3% above the Q4 rate, then grows 7% [S7]. ACV margins are 8% and 9% [S8].

Bull. Revenue is at the consensus high [E1]. Cash gross margin recovers to the FY2025A level of 49.5% [C3]. G&A grows only 3% in FY2028E [S7]. ACV margins of 11% and 13% stand in for synergies [S8].

Qualitative, not in the file. A large hurricane season would add to the bull case. A dealer-wholesale downturn would add to the bear case.

Actuals - **A1** Segment table, D1 (page unverified): U.S. / International, $000. FY2026 service revenues 3,388,287 / 581,233 and vehicle sales 419,143 / 277,546. FY2025: 3,451,558 / 517,104 and 403,546 / 274,750. FY2024: 3,126,102 / 434,900 and 338,633 / 337,188. "Depreciation and amortization, excluding debt costs" 194,749 / 34,624 (FY26) and 184,026 / 31,823 (FY25). U.S. vehicle sales 419,143 vs. cost of vehicle sales 391,028. - **A2** Consolidated statements of income, D1 (page unverified): "Total service revenues and vehicle sales 4,666,209 | 4,646,958 | 4,236,823"; "Operating income 1,652,590 | 1,696,714 | 1,572,023". - **A3** D2 income statement (page unverified): - FY26 / FY25: "Gross profit 2,083,858 | 2,099,643"; "Facility depreciation and amortization 201,669 | 191,775"; "Facility stock-based compensation 8,472 | 8,107"; "General and administrative 373,218 | 348,958" (ex D&A and SBC). - Q4 FY26: gross profit 481,449, facility D&A 53,759, facility SBC 2,275, G&A 97,813, G&A D&A 7,202, G&A SBC 7,530, operating income 368,904, revenue 1,152,439. - Cash flow: "Stock-based compensation 38,818 | 38,004". - **A4** D2 three-month segment table (page unverified): Q4 FY26 vs. Q4 FY25, U.S. service 817,822 vs. 824,813; U.S. vehicle sales 112,512 vs. 101,450; International service 151,722 vs. 131,396; International vehicle sales 70,383 vs. 67,438. - **A5** D1 MD&A (page unverified): "The increase in service revenues for fiscal 2026 of $0.9 million, or 0.0 % as compared to fiscal 2025 came from (i) a decrease in the U.S. of $(63.3) million, and (ii) an increase in International of $64.1 million. The decrease in service revenue in the U.S. was primarily related to the one-time revenue associated with hurricanes Helene and Milton recognized in fiscal year 2025 and a decrease in volume offset by an increase in revenue per car. The growth in International, after excluding positive fluctuations in currency exchange rates of $21.9 million, was driven primarily by an increase in revenue per car and increase in volume." - **A6** D1 MD&A (page unverified): "The increase in the U.S. was primarily driven by an increase in revenue per car, which was due to a change in mix of vehicles sold, which was offset by a decrease in volume. The increase in International, after excluding positive fluctuations in currency exchange rates of $12.1 million was primarily driven by an increase in revenue per car, which was due to a change in mix of vehicles sold, which was offset by a decrease in volume related to sellers switching to a consignment model." - **A7** D1 MD&A (page unverified): "The decrease in the U.S. compared to the same period last year was related to one-time costs associated with hurricanes Helene and Milton recognized in fiscal year 2025..." **A7b**: "The increase in general and administrative expenses for fiscal 2026 of $28.3 million, or 7.0% as compared to fiscal 2025..." - **A8** D1 MD&A overview (page unverified): "Our revenue is impacted by several factors, including total loss frequency and the average vehicle auction selling price, as a significant amount of our service revenue is associated in some manner with the ultimate selling price of the vehicle... We believe the long-term trend of increases in total loss frequency will continue." - **A9** D1 Item 1 (page unverified): "We obtained 79%, 81%, and 81% of the total number of vehicles processed during fiscal 2026, 2025, and 2024, respectively, from insurance company sellers." - **A10** D1 Liquidity (page unverified): "During the winter months, most of our facilities process 5% to 20% more vehicles than at other times of the year." - **A11** D7: "Second quarter revenue of $214 million"; "Marketplace Units of 211,472, approximately flat year over year"; six months total revenue 418,133; Adjusted EBITDA (six months) 37,868; cost of revenue excl. D&A 165,324 + 40,702; "market share gains in dealer wholesale and strong adoption of our Marketplace Services". The Adjusted EBITDA definition excludes "depreciation and amortization; stock-based compensation expense..." -

A12 D1 MD&A (page unverified): "The increase in the U.S. was primarily the result of a change in the mix of vehicles sold, offset by a decrease in volume." (cost of vehicle sales) - **A13** D5: tender expired 2026-10-15 with 116,818,409 shares tendered; "ACV will now operate as an independent subsidiary of Copart". - **A14** D6: "approved the grant to A. Jayson Adair, the Company's Chief Executive Officer ("CEO"), of a nonstatutory stock option to purchase 20,000,000 shares", in tranches at $26.27/$35.03/$43.78/$52.54, with 5-year cliff vesting. - **A15** D4 (slide unverified): ACV revenue chart "$358 $422 $481 $637 $760" (2021A–2025A, $M; year labels read from the chart, unverified). - **A16** D2: "Copart sold more than 4 million units in the last year." - **A18** D1 notes (page unverified): "On October 6, 2023, the Company acquired an 80% controlling ownership in Purple Wave... equal to the $108.0 million acquisition price". - **A19** D1 exhibit list (page unverified): "Transition and Separation Agreement and General Release, dated June 25, 2026, by and between the Company and Jeffrey Liaw". - **A17** D3: "$10.50 per share in cash, representing an implied equity value of approximately $1.9 billion".

Guidance and management statements - **G1** D7: "Reaffirms 2026 revenue guidance of $845 million to $855 million and Adjusted EBITDA of $73 million to $77 million" (ACV, pre-close). - **G2** D7: "Third Quarter of 2026: Total revenue of $219 million to $225 million... Adjusted EBITDA of $21 million to $24 million". - **G3** D3/D4: "expected to be neutral on Copart's earnings per share in the first full year of ownership and accretive in fiscal 2028 and beyond"; "Transaction expected to accelerate revenue growth"; "Meaningful expected near-term cost synergies and revenue synergies across dealer, commercial, and retail channels". No synergy figure is given. Copart itself gives no revenue or EBITDA guidance.

Estimates - **E1** D8, revenue_estimate: FY27 ('0y') average 5,487.76, low 5,403.78, high 5,571.00 (yearAgoRevenue 4,666.21 confirms the fiscal-year mapping); FY28 ('+1y') average 6,216.54, low 6,056.78, high 6,319.85. Q1 FY27 average 1,188.88. No EBITDA consensus is available. - **E2** D9: ACVA CY2027 ('+1y') revenue average 937.51 (CY26 847.60). This may be stale after the delisting.

Assumptions (reasoning + quote) - **S1** U.S. service +2% FY27, +3% FY28. Clean post-hurricane base, slight volume decline offset by revenue per car (A5, A8), no catastrophe. - **S2** U.S. vehicle sales +3%/yr. Mix-driven (A6); below Q4's +10.9% (A4). - **S3** International service +9%/yr. About 8% ex-FX in FY26 (A5) plus the consignment shift (A6). - **S4** International vehicle sales +1%/yr. Consignment shift offsets mix (A6). - **S5** ACV FY27 = 209.9 × 77/92 + 937.5 × 7/12 = 722.5 before scale (C6, E2; close date A13). - **S6** ACV FY28 = 937.5 × 5/12 + 937.5 × 1.10 × 7/12 = 992.2 before scale. CY28 +10% is about ACV's guided CY26 growth (G1: "increase of 11% to 13%"). - **S7** Organic EBITDA = cash GM (C3) × organic revenue − G&A (C4). G&A is flat in FY27 and +5% in FY28 (A7b +7.0% in FY26). Bear: +3%/+7%. Bull: 0%/+3%. - **S8** ACV adjusted EBITDA: stub at the Q4 CY26 implied margin of 7.0% (C6), then 10% in CY27 and 11% in CY28 (base), 8%/9% (bear) and 11%/13% (bull). CY26 guided margin is 8.8% (G1); synergies are unquantified (G3). - **S9** gsnext 5%: organic growth after FY28, mid-single digit, consistent with the FY24–26 organic CAGR of 5.0% (A2). - **S10** mc = average of me and organic reported GM.

Calculations - **C1** YoY = period / prior period − 1 (A1, A4). - **C2** Adjusted EBITDA = operating income (A2) + D&A excl. debt costs (A1) + SBC (A3). FY26 1,920.78; FY25 1,950.57; Q4 FY26 = 368.9 + 53.8 + 7.2 + 2.3 + 7.5 = 439.7 (38.2%); Q4 FY25 475.3 (42.2%). - **C3** Cash gross margin = (gross profit + facility D&A + facility SBC) / revenue (A3): FY26 49.16%, FY25 49.48%, Q4 FY26 46.64%. - **C4** G&A run rate = 4 × 97.813 = 391.25 (A3). - **C5** Scale = E1 / (sum of unscaled Copart lines S1–S4 + ACV S5/S6). FY27 5,487.76 / 5,524.17 = 0.9934; FY28 6,216.54 / 5,970.29 = 1.0412. - **C6** ACV Q4 CY26 = G1 mid 850 − A11 418.13 − G2 mid 222 = 209.87; EBITDA 75 − 37.87 − 22.5 = 14.63. - **C7** Gross margin = gross profit / revenue (A3); forecast = organic revenue × case organic GM (FY26 44.66%, Q4 41.78%, FY25 45.18%) + ACV × C9. - **C8** EBITDA margin = EBITDA / revenue. - **C9** ACV gross margin = 1 − (165.32 + 40.70) / 418.13 = 50.7% (A11). Cost excludes D&A, so it is not like-for-like with Copart's GM (flag). - **C10** Organic revenue = sum of the four Copart lines after scale. - **C11** Organic growth series (finagle leaves): sales +2.2%, +8.7%; EBITDA +1.7%, +9.4%. - **C12** me = FY28 organic EBITDA / revenue = 41.24%.

Not verified - All page numbers (HTML filings): page unverified. - A15 chart year labels; E2 freshness; whether all E1 contributors include ACV. - CEO history beyond the 10-K signatures and the June 25, 2026 Liaw transition agreement (D1 exhibit list).

Appendix C – Method

1. Copart gives no guidance, so the revenue totals are the consensus mean, low and high.
2. Each reported line (segment × service/vehicle sales) is built from its volume and price drivers as stated in the 10-K.

3. ACV is added as a separately shown acquired line, from its last guidance and consensus, mapped from calendar to Copart's July fiscal year by day count and months.
4. The lines are scaled in proportion to the consensus total.
5. Costs:
6. The organic cash gross margin is held at the trailing year.
7. G&A is held at the latest-quarter run rate.
8. ACV is added at an assumed margin.
9. One-time items (hurricane revenue and costs, deal costs) are excluded.
10. EBITDA is analyst-defined: operating income + D&A + stock compensation.
11. No valuation was run.
